

StoCoat Acryl & Acryl Plus

High-performance, weather resistant acrylic topcoats.

To find a better 100% acrylic topcoat, you have to look beneath the surface. StoCoat Acryl and StoCoat Acryl Plus offer more than other products on the market. And, of course, both are backed by our Sto warranty, one of the best in the industry. Take a closer look at StoCoat Acryl and StoCoat Acryl Plus and you'll see the difference.

StoCoat Acryl & Acryl Plus

The topcoats that do so much more than just lie there.

StoCoat Acryl

A high-performance 100% acrylic topcoat, StoCoat Acryl is designed to provide superior protection against sun, salt, wind, rain and corrosion. Vapor permeable with high solids content, this proven solution allows the substrate to breathe naturally, resisting blisters and mold caused by moisture. Plus, StoCoat Acryl offers exceptional fade resistance and complies with EPA and SCAQMD VOC requirements.

StoCoat Acryl Plus

StoCoat Acryl Plus delivers all of the benefits of StoCoat Acryl PLUS so much more! Featuring a higher build, it passes wind-driven rain tests and can be used on both horizontal and vertical applications. For greater flexibility and broader color matching options, StoCoat Acryl Plus is our top choice in topcoats.

Feature	Benefit
Vertical and Horizontal Application	One product for multiple purposes
High Build ¹	Excellent durability
High Grade / Durable	Heavy duty - extended time between repainting
CO ₂ Diffusion Resistance / Corrosion Resistance	Protects embedded reinforcing steel against corrosion
Weather Resistant	Protects against severe sun, heat, humidity, dirt and rain
Low VOC	Safe for workers and the environment
Vapor Permeable	Allows substrate to breathe naturally; resists blisters and mold caused by moisture
Flexible	Resists cracking
Mold / Mildew Resistant	Resists mildew growth
Wind Driven Rain Tested ^{1,2}	Repels water; increases service life of substrate
Excellent Color Retention	Stays attractive longer

¹ StoCoat Acryl Plus ² ASTM D 6904 (formally Fed Spec TT-555 B) - no water penetration with 2 coats or 1 coat and primer after 24 hour water spray and dynamic pressure.

Which is right for your project?
