

# Who is behind our success?

People like Kerstin Bartmann

If you – like Kerstin Bartmann – want to work with enthusiasm and motivation on big tasks, then you are most welcome as an

## Intern in Global Research & Development (f/m/d)

As part of our International Internship Program, you will accompany our research and development activities in daily life and will work on an exciting project, which you will manage independently and thus gain practical experience. Whether you want to complete a mandatory internship or write your Bachelor's/Master's thesis – we are the right place for you, because we rely on talented people who want to develop with us.

### These are your tasks:

- Collaborate in cross-functional teams on a Research project in different areas such as Colloid/Dispersion/Coating Chemistry, Inorganic Chemistry, Construction Technology, Construction Chemistry, Building Physics, Formulation Science, Analytical Chemistry, Polymer Chemistry, Regulatory Chemistry, Sustainable Building
- Plan and perform experiments in the lab
- Summarize results and conclusions of your project work
- Write a final project report and present your results to the management team
- Collaborate with various colleagues in the Sto World

### How to suit us:

- Student (f/m/d) with one of the specializations mentioned above
- Personal competences: strong teamwork skills, flexibility, willingness to take responsibility
- Very good knowledge of English and basic knowledge of German
- Routine handling of the MS Office package

### What to expect:

- An exciting and comprehensive research project
- Flexible working hours and the possibility of mobile work
- Structured onboarding
- An attractive salary
- Other special benefits, e.g. subsidies to the canteen, assistance in finding an accommodation

### Look forward to the Sto working world:

We maintain close, personal contacts – with our market partners, our suppliers and also with our 5,700 employees. In this way, we create a climate characterized by mutual respect and a high level of identification. As a value-oriented company, traditions are our roots and innovations are our future. When it comes to facade insulation systems, plasters, paints, systems for acoustics, concrete repair and floor coating, the Sto Group is a technology leader and successful worldwide with over 1 billion euros in sales.

### Are you in?

Our HR department is looking forward to receiving your application. [Apply here.](#)
